Education

Bachelor of Science (B.Sc.) in Computer Science & Engineering

City University

Apr 2018 – Dec 2022

Dhaka 1216, Bangladesh

- **Thesis:** “Automated Detection of Acute Lymphoblastic Leukemia Subtypes from Microscopic Blood Smear Images Using Deep Neural Networks,” doi: [10.48550/arXiv.2208.08992](https://doi.org/10.48550/arXiv.2208.08992)
- **Research Focus:** Natural Language Processing, Healthcare AI, and Accessible AI.
- **Research Achievements:** 4 peer-reviewed publications (1 journal, 3 conferences).
- **CGPA:** 3.21 / 4.00

Publications

Journal: 1 • **Conference:** 3 • **Pre-print:** 1 • **Citations:** 185+ as of Aug 2026 • **h-index:** 5

Research Experience

Research Engineer

AIMS Lab, United International University

Feb 2023 - Mar 2023

Dhaka 1212, Bangladesh

- Collaborated with the research team to transform research works into integrable applications.
- Developed the Flask backend for a multi-modal AI receptionist robot.

Undergraduate Research Assistant

Supervisor: Md. Touhidul Islam, Lecturer, Dept. of CSE, City University

Dhaka 1216, Bangladesh

Dec 2020 - Nov 2022

- Worked on machine learning research in NLP, statistical ML and medical image processing.
- Co-authored 4 peer-reviewed publications and presented 2 accepted papers at academic conferences.
- Contributed to paper writing, literature review, data preparation, and experiments.
- Mentored junior students in machine learning concepts and research work.
- Deployed two machine learning models as usable Flask applications.

Industry Experience

AI and Application Engineer

KafKai Giken Inc.

May 2023 - present

Tokyo 110-0016, Japan (Remote)

- Built and maintained the Django-PostgreSQL service and AI agents of [KAFKAI V3](#).
- Worked on Ninja API to manage api endpoints; Handled long running tasks using Redis and Celery task queue.
- Reduced LLM API costs by routing to task-specific capable models and providers via OpenRouter.
- Worked on FastMCP server, implemented action-based credit usage, and Stripe top-up.

- Fine-tuned and maintained open-weight LLMs using PyTorch, Transformers, PEFT, HuggingFace Hub for complex generations and data safety.
- Maintained the legacy Pyramid-based codebase and converted it to Django-PostgreSQL architecture.
- Owned production infrastructure on AWS Lightsail, managed PostgreSQL databases, and deployments.
- Collaborated to improve UI/UX of [Kafkai.com](#), [Kafkai.ai](#), and [Puchiden.app](#).
- Managed the affiliate programs communications and outreach of [Puchiden.app](#) and affiliates using in-house affiliate manager similar to Rewardful.
- Conducted technical interviews and the hiring process for the Engineering team.

AI Product Engineer

ChatCopilot.app

Feb 2026 - Present
Gazipur, BD · Independent Venture

- Architected and built ChatCopilot.app, a multi-tenant Django SaaS with agentic AI based sales, support, and appointment.
- Implemented the ReAct agent and agent orchestration including tool calling, states, compaction, routing, translation, image understanding, audio transcription, and human handover.
- Built tenant-scoped RAG for business knowledge and product/service catalogs using pgvector and multimodal embeddings.
- Designed integrations for Meta Graph API, Google Calendar, custom ERP calendars, webhooks, and Pathao courier dispatch.
- Managed the DigitalOcean production droplet, PostgreSQL database, and deployment.

Machine Learning Engineer (Intern)

Shadhin Lab LLC

July 2022 - Aug 2022
Dhaka 1219, Bangladesh

- Worked on NLP-based large volume data collection, labeling, and classification pipelines for an in-house product.

Teaching Experience

Teaching Assistant

Milton English & Math Academy

Gazipur 1750, Bangladesh
Nov 2019 - Mar 2020

- Taught Physics and ICT to secondary and higher-secondary students.

Academic & Technical Services

- **Reviewer**, EuroPython 2025, Prague, Czechia (14-20 July 2025)
- **Reviewer**, 3rd International Conference on Computing and Information Technology (ICCIT), 2023, Tabuk, Saudi Arabia
- **Technical Committee Member**, International Conference on Electronics, Information and Industrial Engineering, 2024, Wuhan, China.

Conferences

- **Speaker**, PyCon ID 2025, Jakarta, Indonesia (14-15 December 2025)
- **Presenter**, 5th International Conference on Computing and Informatics (ICCI), 2022, Cairo, Egypt
- **Presenter**, International Conference on Electronics, Communications and Information Technology, 2021, Khulna, Bangladesh

Achievements

- **Best Paper Award**, 2023 IEEE International Conference on Smart Information System and Technologies
- **Merit Scholarship**, City University, Bangladesh — Summer 2020
- **Junior School Government Scholarship**, Ministry of Education, Bangladesh — 2012

Technical Skills

Languages	Python, SQL, Bash, C
GenAI	Transformers, PyTorch, FastMCP, llama-server, llama-cpp-python, pgvector
LLM APIs	OpenAI, Anthropic, OpenRouter, Perplexity, JinaAI, Ollama
ML & Data	scikit-learn, NLTK, OpenCV, pandas, NumPy, SciPy, Matplotlib
Backend	Django, Flask, Celery, Redis, Pytest, PostgreSQL, SQLite, Stripe
Deployment	AWS (EC2, Lightsail, S3), DigitalOcean, Render, Cloudflare (R2, Workers, D1, etc.), Caddy
Others	Git & GitHub, Linux, LaTeX, HTML

Open Source

- **MochaChat**

Multi-character AI companion with streaming conversations. Built stateless FastAPI backend with browser-local per-character memory, streaming responses, LLM memory compaction, multilingual support, and cheap LLM routing via OpenRouter.

Tools: FastAPI, OpenRouter, Render

- **Python Buddy**

Fine-tuned a small language model (Qwen2.5-coder-1.5-instruct) for code assistance, worked on low-resource training and inference. Achieved 7–12 tokens/s inference speed with 8-bit quantization on Snapdragon 685.

Tools: HuggingFace Transformers, Llama.cpp, Python

- **Inference API Server**

Developed a lightweight Python API server for local/self-hosted LLM inference. Supports GGUF models with both string-based and role-based prompts, returns OpenAI-compatible responses.

Tools: Python, HuggingFace Hub, Llama-cpp-Python

- **Blood Cancer Stage Detection App**

Built a deep learning web app for acute lymphoblastic leukemia (ALL) stage detection. Finetuned and evaluated 4 CNN architectures; MobileNetV2 achieved 98% accuracy across 3 leukemia subtypes.

Tools: TensorFlow CPU, Flask, OpenCV, Unicorn, Render

- **Chronic Kidney Disease Diagnosis App**

Built a Flask-based ML app for early chronic kidney disease detection. Used LOF for outlier removal, SMOTE for imbalance handling, and Random Forest achieved maximum accuracy on test data.

Tools: Scikit-learn, Flask, Unicorn, Joblib, Render

Community & Outreach

Community Lead

AI/ML Professional Community Bangladesh

March 2025 - Present

Bangladesh

- Organize technical webinars and workshops on AI/ML applications.
- Mentor early-career practitioners in development and career pathways.

Community Organizer

Python Bangladesh

Jan 2025 - Dec 2025

Bangladesh

- Organized tech meetups and collaborative events for Python developers across Bangladesh.
- Led initiatives to restart PyCon Bangladesh.

Data Science Bootcamp Mentor

AI Planet (Formerly DPHI)

Sept 2021 - Oct 2021

Hyderabad, India (Remote)

- Supported the core team in running the data science boot-camp.
- Guided participants on Exploratory Data Analysis, created and evaluated final assessments.

Memberships

- **Member**, IEEE Computer Society (Aug 2022 - Dec 2022)
- **Student Member**, Institute of Electrical and Electronics Engineers (IEEE) (Aug 2021 - Dec 2022)
- **Executive Member**, City University Computer Club (Dec 2020 - Oct 2022)

Extracurricular Activities

- **Student Ambassador**, IEEEExtreme (Aug 2022 - Oct 2022)
- **Chapter Influencer**, Google Crowdsourcing (Sep 2021 - Jun 2022)
- **V-Force Volunteer**, United Nations Volunteer (Aug 2021 - Sep 2021)
