

TAUFIQUL HAQUE KHAN

SENIOR AI ENGINEER · BACKEND ENGINEER

Dhaka 1750, Bangladesh

🏠 <https://taufiq.cc/> | ✉ contact@taufiq.cc | 🐙 github.com/2ufiq | 💼 [linkedin.com/in/taufiq-khan-tusar](https://www.linkedin.com/in/taufiq-khan-tusar)

EXPERTISE

AI Systems: Fine-tuning, parameter-efficient fine-tuning (PEFT), retrieval-augmented generation (RAG), vector database, model context protocol (MCP), agentic and multimodal AI, prompt engineering, cost optimization, data safety and compliance.

Software Engineering: System architecture, backend/API development, data modeling, database integration, asynchronous processing, testing, production operations, and cloud deployment.

Engineering Leadership: Technical roadmaps, delivery planning, scoping and prioritization, code review, technical hiring, engineer onboarding and mentoring, stakeholder communication, product ownership, and cross-time-zone collaboration.

SKILLS

Languages	Python, SQL, Bash, C
GenAI	Transformers, PyTorch, LangGraph, FastMCP, llama-server, pgvector, Chroma
LLM APIs	OpenAI, Anthropic, OpenRouter, Perplexity, JinaAI, Ollama
ML & Data	scikit-learn, NLTK, OpenCV, pandas, NumPy, SciPy, Matplotlib
Backend	Django, FastAPI, Flask, Wagtail, Celery, Redis, Pytest, PostgreSQL, SQLite, Stripe
Deployment	AWS (EC2, Lightsail, S3), DigitalOcean, Render, Cloudflare (R2, Workers, D1, etc.), Caddy, Nginx
Others	REST APIs, OAuth, Webhooks, Git & GitHub, Linux, LaTeX, HTML, HTMX, Ajax, Jira/ClickUp

EXPERIENCE

AI and Application Engineer

KafKai Giken Inc.

May 2023 - present

Tokyo 110-0016, Japan (Remote)

- Built and maintained the Django-PostgreSQL service and AI agents of [KAFKAI V3](#).
- Reduced LLM API costs by 50% by offloading/routing to task-specific capable models and providers.
- Built the FastMCP server, implemented action-based credit usage, and Stripe top-up for the upcoming Kafkai V4.
- Fine-tuned and maintained in-house LLMs from HuggingFace for long-running tasks, API cost-reduction, and data safety.
- Maintained the legacy Pyramid-based codebase of Kafkai V2 and converted it to Django-PostgreSQL architecture.
- Managed the deployment, monitoring, sentry, kanban, and technical support of multiple SaaS products.
- Collaborated with UI/UX team to improve user experience of [Kafkai.com](#), [Kafkai.ai](#), and [Puchiden.app](#).
- Conducted product cost and revenue analysis, pricing strategies, and competitor studies for [Kafkai.com](#) and [KaiMail.net](#).
- Managed the affiliate and partner programs of [Puchiden.app](#).
- Conducted technical interviews and the hiring process for the Engineering team.

Research Engineer

AIMS Lab, United International University

Feb 2023 - Mar 2023

Dhaka 1212, Bangladesh

- Collaborated with the research team to transform research works into integrable applications.
- Developed the Flask backend for a multi-modal AI receptionist robot.

ADDITIONAL EXPERIENCE

Independent Product Engineer

ChatCopilot.app

Feb 2026 - Present

Gazipur 1750, Bangladesh

- Architected and built ChatCopilot.app, a multi-tenant Django SaaS for AI-assisted sales, customer support, product discovery, orders, and appointment bookings.
- Implemented an agent runtime with tool calling, conversation state, history compaction, model routing, Bengali translation, image understanding, audio transcription, and human handover.
- Built tenant-scoped RAG for business knowledge and product/service catalogs using pgvector and multimodal embeddings.
- Designed integrations for Facebook Messenger, website chat, Google Calendar, custom business ERP calendars, outbound webhooks, and Pathao courier dispatch.
- Implemented subscription plans, per-tenant quotas, LLM usage and cost accounting, sandbox testing, asynchronous message batching, and operational dashboards.
- Managed the DigitalOcean production droplet, uptime monitoring, resource usage, and PostgreSQL database.

PROJECTS

- **MochaChat:** AI charecters and conversation with streaming responses and zero-data-retention model routing. 
 - Implemented roleplay, streaming, and zero-data-retention model routing.
 - Used FastAPI, OpenRouter, and Render deployment.
- **Python Buddy:** A Small Language Model-based Python Coding Assistant for mobile devices. 
 - On-device inference ~10tok/s with Snapdragon680 4GB, Model Qwen-2.5-Coder-1.5-Instruct.
 - Applied PEFT, quantization. Used PyTorch, Transformers, llama.cpp.
- **Bengali AI Receptionist:** AI receptionist backend for a university admission office. 
 - Implemented face, speaker & speech recognition, RAG, text-to-speech. Used Transformers, Flask, SQLite, gTTS, OpenCV.

VOLUNTEERING

Community Lead

March 2025 - Present

AI/ML Professional Community Bangladesh

Bangladesh

- Organize technical webinars and workshops on AI/ML applications.
- Mentor early-career practitioners in development and career pathways.

EDUCATION

BSc in Computer Science & Engineering

Apr 2018 - Nov 2022

City University

Dhaka 1216, Bangladesh

- **Thesis:** “Automated Detection of Acute Lymphoblastic Leukemia Subtypes from Microscopic Blood Smear Images Using Deep Neural Networks,” doi: [10.48550/arXiv.2208.08992](https://doi.org/10.48550/arXiv.2208.08992)

PUBLICATIONS
